

Command and Control Cybersecurity & Emergency Management Preparedness Exercises

Incident & Emergency Response Planning

- Cybersecurity threats - Ransomware, DDoS, etc
- Physical Threats
- Crisis Communication Planning
- Business Continuity Planning
- Power Outages
- Emergency/Disaster Response Planning
- Natural Disasters/Extreme Weather
- COVID-19

NUARI was awarded funds from The Department of Homeland Security to extend the DECIDE platform for the Energy Sector.

"Bringing players together in a safe, immerse environment where they can run through existing response tactics allows them to identify vulnerabilities and develop mitigation strategies prior to a real-life crisis. DECIDE offers organizations seeking to bolster their cyber strategies a low-risk. High-value tool, and we look forward to working with NUARI and our energy stakeholders to customize the technology to their unique needs." - Greg Wigton, DHS, S&T Program Manager.

Types of Exercises the DECIDE Platform can help facilitate:

Discussion Based Exercises

1. Seminars
2. Workshops
3. Tabletop (TTX)

Operation Based Exercises

1. Functional Exercises (FE)
2. Full-Scale Exercises (FSE)

Command and Control exercises build organizational resilience, and DECIDE was created to help facilitate and engage organizations through these types of exercises.
